## Profile Info

Data Analyst with 4+ years of experience in operations research, MIS, and reporting. Proficient in SQL, Python, Excel, Power BI, and Power Query for extracting, cleaning, and visualizing data. Skilled in optimization modeling, forecasting, and data validation to deliver accurate insights and improve decision-making. Adept at collaborating with cross-functional teams to streamline reporting processes, enhance efficiency, and support business performance.

## Skills

- Problem Solving & Critical Thinking
- Data Storytelling & Insight Communication
- Data Validation & Testing
- Requirements Gathering & Documentation
- Precision Under Pressure
- Reporting & Data Analysis
- Task & Project Coordination
- Attention to Detail
- Process / Workflow Automation
- Communication & Team Player

## Experience

MAR 2020 – FEB 2022

Operations Research Analyst | Cloudware Networks Pvt Ltd | Kandy, Sri Lanka.

- Developed and implemented linear programming models to solve optimization problems, including resource allocation and cost minimization.
- Applied mathematical optimization techniques (min-max optimization, sensitivity analysis) to support decision-making in hypothetical business cases.
- Designed and solved operations research models (transportation, assignment, and scheduling problems) using Excel Solver and programming tools.
- Conducted Monte Carlo simulations to model uncertainty and assess risk in decision-making scenarios.
- Applied queueing theory and inventory optimization to improve theoretical operational efficiency.
- Developed cost-benefit analysis models to evaluate alternative strategies and optimize resource utilization.

FEB 2022 – DEC 2024

MIS Analyst | Fair First Insurance Limited | Union Place, Colombo, Sri Lanka.

- Extracted, cleaned, and organized data from multiple sources using SQL, Excel, and Power Query for MIS reporting.
- Supported project tracking and prepared periodic MIS reports to ensure timely delivery of business insights.
- Analyzed claims, policy, and customer data to generate reports that supported performance monitoring and decision-making.
- Designed and maintained dashboards and MIS reports in Power BI and Excel for senior management.
- Conducted data validation and contributed to SIT/UAT processes to ensure system-generated reports were accurate and reliable.
- Partnered with cross-functional teams to streamline reporting workflows and enhance MIS efficiency.

DEC 2024 – AUG 2025

Data Analyst | Meeza QSTP | Doha, Qatar.

- Leveraged SQL and Python to extract, clean, and transform large datasets, creating automated workflows to reduce manual effort.
- Designed interactive Power BI dashboards with advanced DAX measures to monitor product performance, customer engagement, and KPIs.
- Applied statistical techniques and forecasting methods to identify trends and support strategic planning.
- Delivered end-to-end data analysis solutions, from data discovery to visualization and presentation of insights.
- Collaborated with product, engineering, and marketing teams to ensure accuracy, scalability, and business alignment of analytics.

## Education

DEC 2018 - AUG 2022

Bachelor's Degree in Statistics and Operations Research | University of Peradeniya | Kandy, Sri Lanka.

## Certificates

- Data Visualization and Dashboards with Excel and Cognos | IBM | 2022
- R Programming | John Hopkins University | 2023
- Data Analysis with Python | IBM | 2023
- Data Visualization with Python | IBM | 2023
- Python for Data Science and AI Development | IBM | 2024
- Databases and SQL for Data Science with Python | IBM | 2024
- Python and Statistics for Financial Analysis | Hong Kong University | 2025
- Advanced Learning Algorithms | Stanford University | 2025
- Supervised Machine learning Regression and Classification | Stanford University | 2025
